Case study of DASCOM Europe GmbH

Issue S/2019

Geiger deploys DASCOM dot matrix printers in tunnel excavation works

The Tally 2150S reliably carries out its work on major construction sites

The customer

The Geiger group of companies, based in Oberstdorf in the Allgäu region, undertakes delivery, building, renovation and waste disposal works for its clients in the infrastructure, real estate and environmental sectors. This medium-sized family business, currently managed by the third generation, is active far beyond the boundaries of the Allgäu. The group of companies employs around 2,500 people across more than 50 sites,

not only in Germany but also in Austria, Switzerland, Luxembourg, France, Italy, Hungary and Romania.

So you also need a tough dot matrix printer. The Tally T2150S is totally resistant to external environmental influences. Temperature fluctuations or dust present it with no problems. The Tally T2150S just remains cool and unwaveringly carries on printing and printing. And it is so user-friendly that it immediately cuts the continuous form and transfers it via a chute system directly to the lorry driver at the weighing station.

The perfect construction site printer

The Tally T2150s prints for tunnel excavation works

The period up to the end of 2019 sees the construction of the Boßlertunnel, for the new intercity express railway line to Ulm. The Geiger group of companies was awarded the contract to transport away and dispose of the excavated material. 10,000 tonnes of stone are weighed and loaded every day. And this is where the powerful Tally T2150S dot matrix printer with integrated cutter

comes in. In special weighing containers, it prints weighing slips and the acceptance documents required for transporting and disposal of the material excavated from the tunnel. At peak times, up to 500 forms a day need to be printed, without affecting the loading process. The entire weighing process, including printing, takes no more than one minute.

Tough use in a tough environment

The construction industry is a tough environment.

The people at Wilhelm Geiger GmbH & Co. KG are delighted with their extremely versatile power printer. In conjunction with the TallyCom III Ethernet Box, the printer can not only be used by multiple users simultaneously but is also easy to manage. All settings for the printer and interface can be configured from a central location using an internet browser. So it's no wonder that the Geiger group of companies also want to use the proven Tally T2150S dot matrix printer at other construction sites too.

DASCOM's dot matrix printers – Simply unbeaten

At home in all application areas – The Tally T2150S dot matrix printer

The T2150S is a dot matrix printer with an especially wide range of features. Its printing speed, monthly print output, user-friendliness and reliability – The T2150S with its integrated cutter and 80-character print width offers an outstanding price/performance ratio. Paper thickness detection, paper direction switching, automatic paper cutter and single sheet feed detection – all these features guarantee optimum printer deployment. Various interfaces and emulations enable you to integrate it into various environments.

2 years' guarantee for dot matrix printers

From the moment of delivery, the Tally T2150S is subject to a free 2-year warranty. This guarantee covers all spare parts and the necessary labour. Not included in the price are consumables and wear parts. What's more, additional servicing cover options are available with the various TIP Plus packages, covering 24, 36 or 48 months, or a service agreement.

The highlights at a glance:

- Multifunctional dot matrix printer for a range of applications
- Flexible paper input using sheet feeders and continuous tractor units
- Comprehensive automatic functions for unsupervised printing processes
- 22 barcodes, OCR-A and OCR-B, block lettering
- Wide range of interfaces, emulations and drivers
- Sturdy construction for reliable, low-noise operation (53 db[A])

Configuration options

- T2150S with cutter
- T2150S IGP with cutter and IGP/PJL

Tally T2150S

The products of DASCOM Europe GmbH:

Dot-matrix printers

Innovative all-rounders.

The right decision if you need to print quickly, cost-effectively and in large volumes with carbon copies.

Flatbed Printer

Strong guys.

Whether multiple sets or continuous forms, perfect for recipes, receipts, application forms, invoices, loading lists, etc.

Thermal printers

Robust and compact.

Suitable in several areas such as production, medical supplies or trade for a wide variety of uses.

Mobile printers

The work place professionals.

Compact in size, well thought out details, cost-effective basic model with numerous upgrade features.

Card printers

Fast and reliable.

Whether company cards, loyalty cards or cashless payments – the right cards have to meet many requirements.
