USB Access to Printer Web Pages

1. Connect USB cable from printer to host
2. With printer turned on, set the printer into configuration mode by double-clicking the POWER button.
   Both the Power LED and Fault LED will flash together.
3. Open browser on your host and type *169.254.200.1* into the address bar of the browser
   (**Note:** Firefox or Chrome will work best) and hit Enter.
4. A login box should appear.

Configuration Interface
Password:
Login

5. Type "0000" and hit Enter- you should now be at the home page for DP-530 Configuration.
6. To return the printer to normal operating mode, double-click the POWER button.
   The Power LED will be returned to a solid light.

Once the printer is connected via USB <u>and</u> in *IP over USB* mode it is temporarily not possible to access the Internet.
